

Welfare Knowledge

The Round 7 interview included a section on knowledge of welfare rules. Due to confidentiality protections, the questions and data from the Welfare Knowledge section are accessible only under geocode agreement with BLS. The section includes data from 470 female respondents with and without resident children. Respondents answered questions about the eligibility of a hypothetical family for TANF, Food Stamps and Medicaid. In addition, respondents indicated their understanding of time limits for parents and children for the same three assistance programs. The data file contains sufficient detail for users to compare respondents' answers to actual program rules.
